

EASTI DAMAYANTI

UI/UX | Project Management | Data Analysis | Full-Stack Developer | AI Engineer
Indramayu, West Java Province | Email: eastidmyt@gmail.com | [portfolio easti damayanti](#)

SUMMARY

Software Engineering Graduate with hands-on experience in UI/UX design, full-stack development, project management, quality assurance, and AI Engineer. Proven ability to contribute to end-to-end digital products, collaborate with teams, and translate user needs into intuitive and functional interfaces, primarily using Figma for design and Laravel, React, and Tailwind for development, while remaining adaptable to other tools and tech stacks as needed. Experienced with Agile workflows, design systems, and data management. Seeking opportunities in UI/UX Design, Project Management, Frontend Development, Quality Assurance, Data Analysis, or other related IT roles.

WORK EXPERIENCE

Full-Stack Developer – Internship

CV Creative Gama Studio (July 2025 - December 2025)

- Built a POS web system (SiBengkel) end-to-end: designed user flow, database architecture, and operational workflow.
- Led a team of 8 members in migrating SIMDES website from PHP 8 to Laravel 12, normalizing 200+ database tables while improving layout consistency and UX.
- Implemented dual-role access control using Laravel Spatie package, reducing code redundancy.
- Created dynamic features for correspondence (Persuratan) and population data (Data Kependudukan) with real-time sync logic.
- Developed both public-facing and admin-side modules for letter submission with full synchronization.
- Produced software testing documentation to verify functional and usability requirements.
- Conducted daily reviews directly with company director.

UI/UX Designer – Freelance

Melati nusantara Website (July – August 2025)

- Translated client briefs and existing website content into consistent, user-centered UI/UX designs aligned with the established website flow and visual direction.
- Created wireframes and high-fidelity prototypes as a complete interactive demo and developer-ready reference for implementation.

- Structured extensive textual content into engaging layouts using visual hierarchy, typography, spacing, and intuitive content flow to improve readability and user experience.
- Extended existing website sections while maintaining consistency in design, content structure, navigation, and overall user experience.

Administrative Staff – Part Time

Yayasan Barokah Tin Kartini (March 2022 – Present)

- Started as daily income monitor staff for a SPBU (2022).
- Progressed to Administrative Staff at (2022–2024), a Pertamina partnered gas agent — managed distribution data and procurement workflows.
- Moved to IT Administrative Staff (2024–2025) managed website, social media, product catalogs, and built an automated invoicing system (saved Rp 320,000/month).
- (Dec 2025 – Present) serving as PIC for branch operations, coordinating daily activities, personnel, and facility requirements; preparing daily operational reports using Excel and Word to update partnership coordinators.

PROJECT EXPERIENCE

LLMs Machine Translation Model – Full-stack Developer

Undergraduate Thesis (January 2026 - August 2026)

- Contributed to a BIMA government-funded research project under a university professor's supervision.
- Conducted literature reviews on relevant international and Indonesian research.
- Helped build a 50,000+ sentence Indonesian–Indramayu parallel corpus via OCR, AI-assisted generation, and manual validation.
- Assisted in designing the research workflow, from dataset preparation to model training and evaluation.
- Ran experiments with LLMs models like Llama, Gemini, GPT, and Qwen. Analyzed translation performance using evaluation metrics like BLEU, METEOR, BERTScore, Chrf+, Comet and Comet Kiwi.
- Supported research documentation and preparation of final outputs.

Pocketify Mobile Apps – UI/UX & Mobile Developer

Project 3 Subject (February 2025 – June 2025)

- Brainstormed and designed system flow diagrams including use case, activity, and ERD diagrams to define application logic.
- Designed complete UI/UX for a savings mobile app with a gamification concept using Figma, including custom icon assets and curated visual elements aligned with the concept.
- Developed the mobile application frontend using React Native based on the finalized design.
- Built Machine Learning with a money value prediction model using MobileNetV2 to detect and predict currency amount captured via camera, integrated as a core feature of the app.

PetaniTech – Full-Stack & Mobile Developer

Government-Funded Research Project, under Lecturer Supervision (September 2024 – December 2024)

- Joined a government-funded research project supervised by a university lecturer, building both web admin system and mobile app.
- Collaborated with Backend Developers and System Analysts to define application concepts.
- Designed mockups and assets using Figma and Canva, built web frontend (HTML, CSS, JS) and backend (PostgreSQL, PHP, Laravel).
- Developed mobile frontend using React JS and Flutter-based assets, delivering interactive, user-friendly features.

PORTALGANK Website – UI UX Designer

KMIPN VI (June 2024 - July 2024)

- Designed application concepts and contributed to the project's success in reaching the top 15 in the competition.
- Created detailed user interfaces and website banners and vector using Figma.

POLINDRA TOEFL – UI/UX & Web Developer

Project 2 Subject (February 2024- June 2024)

- Researched TOEFL scoring mechanisms and collaborated with teammates to define the exam simulation concept and user experience flow.
- Prepared user documentation including SKPL (Software Requirements Specification) and DPPL (Software Design Description), along with test scenarios for various use cases.
- Designed the web UI and contributed to frontend development using HTML, CSS, and Bootstrap.

ACTIVITIES

IPEC Competition – Online

Participant in Speech Category (9th October 2024)

- Delivered a five-minute impromptu English speech with one hour of preparation time.

Candidate IISMA MBKM – Online

As Candidate Interview (January 2024 – February 2024)

- Prepared essays in English and advanced to the interview stage.
- Completed a full English interview in 25 minutes.

TOEIC ETS – Online

As Test Taker (12th January 2024)

- Completed the test within two hours and achieved a total score of 725.

NPEO Competition – Palembang

Participant in Speech Category (19th – 23rd June 2023)

- Delivered speeches on two themes in English.

Foreign Language Forum POLINDRA – Indramayu

As secretary (2023)

- Organized and arranged events, ensuring smooth execution and coordination.
- Managed administrative tasks, including handling correspondence, drafting official letters, and preparing event permission documents.

EDUCATION

POLITEKNIK NEGERI INDRAMAYU

undergraduate of Software Engineering Major - GPA 3,90
